EXPERIENCE

Founder & Technical Lead | Requion LTD

2026 – Present

- Lead web application auditing and compliance engagements for clients
- Develop and deploy custom web platforms using Svelte, React, and cloud databases
- Conduct security assessments and provide hardening recommendations for client systems
- Manage end-to-end project delivery, from scoping and architecture to deployment

Freelance Developer & Designer | Self-employed

2019 – 2024

- Delivered 2D animations, custom thumbnails, corporate videos, and game asset design
- Collaborated with independent developers on game projects as an asset designer and project manager
- Worked with Adobe Photoshop, After Effects, and Premiere Pro across a wide range of client briefs

PROJECTS:

Sab-Ez-Khata

Sab-Ez-Khata is a work in progress drop-in SAP-SE ERP replacement (exclusively for an import/export warehouse) which I am working on currently. It is a hybrid platform which will be available to employees with the desktop app client and an Android field app. The backend is built in Go and the client side is built in tauri + svelte SPA.

HomeChefAI

HomeChefAI is an LLM powered culinary mobile app built on React + Cordova + ExpressJS + Vercel + Firebase Cloud + Gemini Flash

Travel Partner

TravelPartner is an application that was built for enabling collaborative traveling by sharing expenses of fuel between people who's timetable and destinations align. Built in Javalin + sqlite.

SOC-In-A-Bot

An LLM powered Discord bot that enriches SIEM alert data with additional insights and mitigation guides. Built with Golang + OpenRouter + sqlite.

Peeker

A discord bot which allows to track prices of products and services on the internet. Built in JavaScript and sqlite.

I have also built GDPR compliant static sites for private customers which are not listed.

TECHNICAL SKILLS:

Programming Languages

- JavaScript built multiple full-stack projects; comfortable across frontend and backend
- C systems programming enthusiast
- Python regular use for task automation and scripting
- Go recently adopted for its cost-effective approach to async programming & backend

Linux & Systems

- Linux Systems Administration setup and management of services and containers
- Linux Server Configuration web server configuration and deployment
- Docker containerization & management. Have worked with networking
- Kali Linux Entry-level practical knowledge of penetration testing, exploitation, and ethical hacking workflows

Information Security / Security

- SIEM Management and configuration know-how. Used suricata to protect servers from unauthorized access.
- Web Application Pentesting & Auditing hands-on experience with real-world systems; familiar with modern web app attack surfaces and able to advise on securing them
- Device Security Hardening working knowledge of common vulnerabilities and attack vectors

Application Development

- Svelte, React built multiple SPAs in Svelte; one mobile app using React + Cordova
- Tailwind CSS primary styling tool for frontend projects
- Firebase, Supabase, Neon used as primary databases across most projects
- Express.js built REST APIs integrating multiple services, including Gemini LLM
- Cordova, Tauri webview-based mobile/desktop applications

Soft Skills: Tech support, Computer hardware, Communication

EDUCATION

Bachelor in Cyber

Dawood University of Technology, In progress, expected 2028 CGPA: 3.49

- *Research: Quantum Computers and Their Security Consequences* (unpublished)

Primary Education from recognized School and College. (irrelevant to mention)

CERTIFICATIONS:

Google Cybersecurity Professional Certificate

Credential ID 09U8AE4I383L
