Full-Stack Software Engineer

Web application development, cloud infrastructure, and security-focused engineering. Comfortable working autonomously, shipping across platforms, and using AI to accelerate delivery.

EXPERIENCE

Founder & Technical Lead | Requion LTD

2026 – Present

- Develop and deploy custom web platforms using Svelte, React, and cloud databases
- Lead web application auditing and compliance engagements for clients
- Conduct security assessments and provide hardening recommendations for client systems
- Manage end-to-end project delivery, from scoping and architecture to deployment

Freelance Developer & Designer | Self-employed

2019 – 2024

- Delivered 2D animations, custom thumbnails, corporate videos, and game asset design
- Collaborated with independent developers on game projects as an asset designer and project manager
- Worked with Adobe Photoshop, After Effects, and Premiere Pro across a wide range of client briefs

TECHNICAL SKILLS:

Languages: Go, JavaScript, TypeScript (working knowledge), Python, C

Frontend: React, Svelte/Sveltekit, Tailwind CSS

Backend: Express.js, REST API design

Mobile: tauri, Cordova for webview apps

Databases: PostgreSQL (via Neon and Supabase), Firebase

Cloud & Deployment: Google Cloud Platform (GCP) basics, Vercel, Linux server configuration

Security: Web application auditing, penetration testing, Linux systems administration, device hardening

PROJECTS:

Sab-Ez-Khata

Sab-Ez-Khata is a work in progress drop-in SAP-SE ERP replacement which I am working on currently. It is a hybrid platform which will be available to employees with the desktop app client and an Android field app. The backend is built in Go and the client side is built in tauri + svelte SPA.

HomeChefAI

HomeChefAI is an LLM powered culinary mobile app for recipe suggestions built on React + Cordova + ExpressJS + Vercel + Firebase Cloud + Gemini Flash

Travel Partner

TravelPartner is an application that was built for enabling collaborative traveling by sharing expenses of fuel between people who's timetable and destinations align. Built in Javalin + sqlite.

SOC-In-A-Bot

An LLM powered Discord bot that enriches SIEM alert data with additional insights and mitigation guides. Built with Golang + OpenRouter + sqlite.

Peeker

A discord bot which allows to track prices of products and services on the internet. I made it for personal use to track steam game prices. Built in JavaScript and sqlite.

I have also built many GDPR compliant static sites for private customers which are not listed on GitHub.

CERTIFICATIONS:

Google Cybersecurity Professional Certificate

Credential ID 09U8AE4I383L
